Notice of Fee Increase on October 1, 2004

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2004, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" because some fees will increase effective October 1, 2004. See Revision of Patent Fees for Fiscal Year 2005; Final Rule, 69 Fed. Reg. 52604, 52606 (May 10, 2004).

The current fee schedule is accessible from WEB site (<http://www.uspto.gov/main/howtofees.htm>).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2004 (or mailed with a certificate of mailing on or after October 1, 2004), the issue fee paid should be the fee that is required at the time the fee is paid. See Manual of Patent Examining Procedure (MPEP), Section 1306 (Eighth Edition, Rev. 2, May 2004). If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See MPEP Section 1308.01.

Effective October 1, 2004, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
- By a small entity (Sec. 1.27(a))..... \$685.00
 - By other than a small entity..... \$1,370.00
- (b) Issue fee for issuing a design patent:
- By a small entity (Sec. 1.27(a))..... \$245.00
 - By other than a small entity..... \$490.00
- (c) Issue fee for issuing a plant patent:
- By a small entity (Sec. 1.27(a))..... \$330.00
 - By other than a small entity..... \$660.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Bruckner on October 13, 2004.

The application has been amended as follows:

IN THE CLAIM:

Claim 1, last line after second 'and said' insert --controller--.

The following is an examiner's statement of reasons for allowance: with respect to claims 1,17,25,48, and 51 in the environment of a telemetry apparatus the closes prior art Maass '799, disclose the use of a monolithic chip in a dangerous or inaccessible environment having sensing, transmitting and control means. However, Maass fail to teach or suggest an apparatus comprising, a data acquisition means, a controller for selectively enabling a transmitter or other components at selected times such that these components only use so much power as is required to process and transmit information and a clock circuit operable connected to a data acquisition means, a transmitter, a receiver and/or oscillator and a controller. With respect to claims 52 and 55, the controller means activating and deactivating various components in a programmed sequence so as to minimize the potential of interference from radio

Art Unit: 2635

frequency transmitter to other components while processing and transmitting information. With respect to claim 56 the controller means activating and deactivating various components in a programmed sequence whereby power is provided only to components needed to perform a specific function and there is no overlap in active operation between the radio frequency transmitter and any other operation on the apparatus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Little et al '858 who teaches the use of a monolithic chip for storing data and means to prevent unauthorized access to the storing means. However, Little fail to teach or suggest an apparatus comprising, a data acquisition means, a controller for selectively enabling a transmitter at selected times and a clock circuit operable connected to a data acquisition means, a transmitter, a receiver and a controller. Rypinski et al '126 discloses a monolithic integrated circuit receiver having power conservation means for selectively power circuits as needed. However, Rypinski fails to teach or suggest a data acquisition means, a controller for selectively enabling a

transmitter at selected times and a clock circuit operable connected to a data acquisition means, a transmitter and a controller. Examiner has no reason to combine references.
